# The 6x6 Income Plan

Lets understand the basics of the business plan.

In Vestige the primary aspect is the Point Values PV.

- Each product has a unique point value associated with it according to its distributor price DP.
- And 1 PV = Rs.18.
- PV is used to calculate your cashback/income of the month from our own purchase.
- PV is used to calculate income from your downlines of the month.
- PV is also used to determine your designation level in Vestige. *Double Universal Crown Director* is the highest and *Distributor* designation is the beginning in Vestige.

# The 6x6 Income Plan

- Lets calculate the earning on your own purchase.
- Joining month you did 40 PV of shopping, check the table below;  
40 PV is eligible for 5% of earning. Meaning 5% of your own 40 PV which is 2 PV.
- And 1 PV = 18, you had 2 PV so your earning is Rs.36

Keep this PV importance in mind we will use it to demonstrate the 6x6 income plan.

# The 6x6 Income Plan

In this plan; it is compulsory to purchase a minimum of 40 PV of products for 5 months at least to earn the income stated in the next pages.

Lets start your carrier from the 1<sup>st</sup> month.

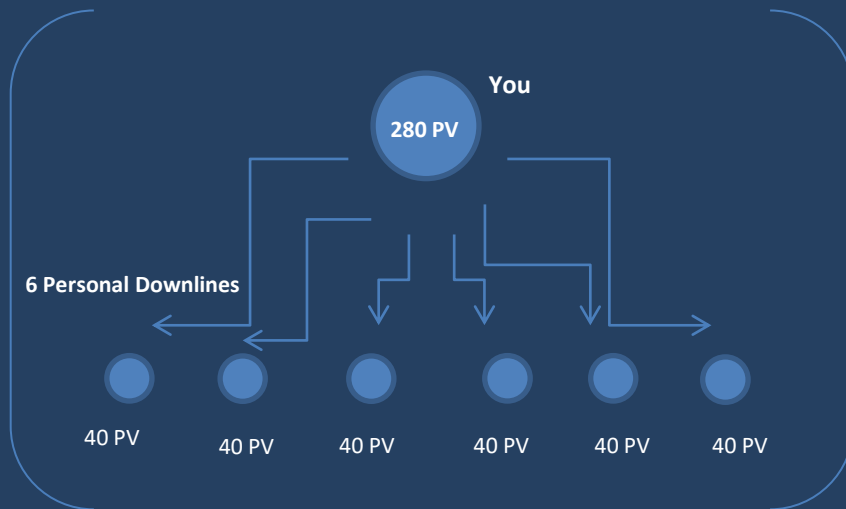

## 1<sup>st</sup> month

- You did 40 PV and you joined 6 members below you who also did 40 PV each ; Total 280 PV.
- 280 PV is in 5% of slab in the table. So the whole team got 5% of 280 PV that is 14 PV.
- Remember when you had 40 PV you earned 2 PV, similarly your downlines also have 40 PV each and they will get 2 PV each from this 14 PV earned by the group.

So, 12 PV is out to your downlines and left is 2 PV out of 14PV which is your income from the downlines.

2PV from Downlines + 2PV From Your Own Purchase = 4PV = Rs.72

Looks very less isn't it ? There's lot more incoming.

1<sup>st</sup> month

Total PV 280

Earning from group = 2 PV.

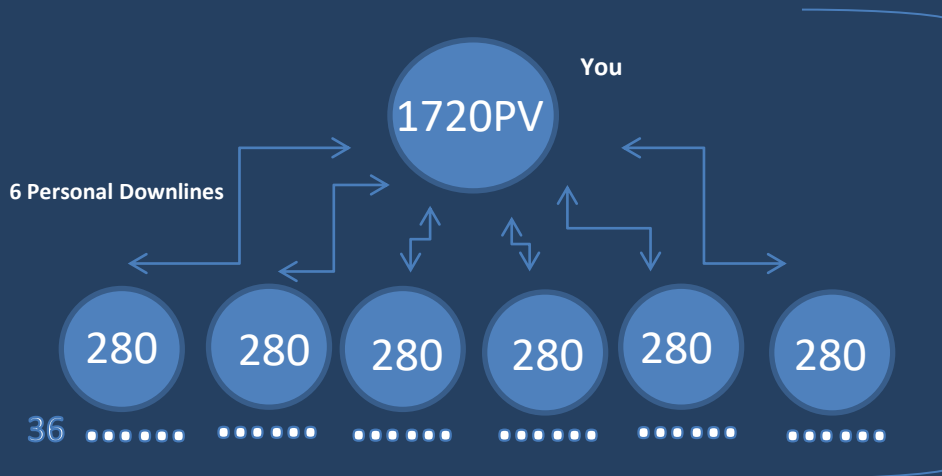

Earning from Self 40PV = 2 PV.

## 5% of 280 PV
